Education

•Bachelor of Technology in Computer Science and Engineering (AIML) *2023-2027*
Manav Rachna University, Faridabad CGPA: 9.08

•Board of Intermediate Education, Andhra Pradesh *2021-2023*
Amaravathi Junior College 94.8%

•Board of Secondary Education, Andhra Pradesh *2020-21*
Dr. KKR's Gowtham E.M High School 97%

Internships

- **NPTEL Winter Internship – Full Stack (MERN Stack), IIT Ropar (Virtual)** *Jan 2026 – Apr 2026*
  - Currently in Phase 2 of a structured 10-week internship focused on JavaScript, TypeScript, React, Express, and MongoDB.
  - Applied full-stack concepts through case studies including REST APIs, frontend components, and database integration.
  - Cleared technical evaluation stages and progressing towards the final project development phase.
- **Summer Intern — Sign Language Recognition, Centre for Health Innovations (CHI), MRIIRS** *Jun 2025 – Jul 2025*
  - Developed a real-time Indian Sign Language recognition system using MediaPipe and deep learning models.
  - Implemented keypoint extraction pipeline (102D landmarks) and trained LSTM, GRU, and BiLSTM models.
  - Integrated live webcam predictions with a web-based interface for real-time gesture classification.

Projects

- **A Multimodal CNN–LSTM Hybrid Model for Cattle Breed Classification and Milk-Trait Prediction** *GitHub*
  Built a multimodal CNN–LSTM system for joint breed classification and milk-trait prediction, achieving **96.52% accuracy** and low **MAE 0.0614**. Includes evaluation of multiple pretrained CNN backbones.
- **Food Freshness Detection Using ML** *GitHub*
  Developed a CNN-based model to classify food freshness from images and integrated clustering methods for multi-level freshness detection. Evaluated multiple pretrained architectures and validated performance on real-world samples.
- **Recurrence Prediction of Thyroid Cancer Using Supervised Learning**
  Designed a hybrid supervised model for thyroid cancer recurrence prediction using clinical datasets; includes feature engineering and model optimization. Research paper in progress.

Technical Skills and Interests

Programming Languages: Python, C++, JavaScript, TypeScript
Web Technologies: React.js, HTML, CSS, Express.js, MongoDB (MERN Stack)
Core CS Fundamentals: Data Structures and Algorithms, OOP, DBMS (Basic)
Libraries & Tools: MediaPipe, NumPy, Pandas, Git, GitHub, VS Code
Concepts: Problem Solving, Object-Oriented Programming, Machine Learning

Research Papers and Publications

- **Patent Publication (2026): Produce Management System for Retail and Food Services** *(Listed as Inventor)*
- **Food Freshness Detection** *(Presented – IEEE ICEI 2026 Conference)*
- **A Landmark-Based Temporal Pipeline for Real-Time Adjective Recognition in Indian Sign Language** *(Submitted – Springer, Multimedia Tools and Applications)*
- **A Hybrid Machine Learning Framework for Predicting Differentiated Thyroid Cancer Recurrence** *(In Submission – IC3ECSBHI'2026 Conference)*

Achievements And Hackathons

- Dean's List for Academic Excellence (SGPA 9.43/10, Semester 4).
- Smart India Hackathon (SIH 2025) – National Level Participation.
- NPTEL – The Joy of Computing Using Python (Elite, Top 5%).

Certifications

- **NPTEL – The Joy of Computing Using Python (Elite, Top 5%)**
  Scored **94%** in a 12-week IIT Madras course; Top **5%** among 20,403 participants. *Roll No: NPTEL25CS103S956100247.*
